50X1-HUM

1. Three new 100 Kw radio transmitters were recently installed at Ljubljana, Zagreb and in the neighborhood of Smederevo in Serbia.

50X1-HUM

2. In connection with the Ljubljana transmitter, a new technical maintenance department and a new studio are being erected in Sabicarsce. The transmitter remains near Trenje, and is connected by underground cables to a studio in Vaska Street.
3. The new Ljubljana transmitter aerial mast is 126 meters in height and was constructed by the Zeljeznik Konstrukcija i Mostova factory at Maribor. The structure is of galvanized steel lattice work.
